From simple business websites and eLearning implementation to complex enterprise applications we can provide the best technologies and solutions to match your business goals and budget. By leveraging our experience and expertise we help our customers increase efficiency, reduce time-to-market, and gain offshore cost savings.

.Net development

Microsoft .Net technology helps you solve your business issues through distributed applications. Your requirement might be a custom application development or a migration project. Or it may be integrating an application with your own or your partner systems. Whether your immediate focus is on a specific development area or is part of an enterprise initiative, you are going to find it a lot easier with a partner that has been there and done it before. OptioLogic delivers this advantage to its clients by combining a highly talented workforce with the cost advantages of offshore development.

- Cross platform expertise
- Fully integrated solutions
- High management bandwidth
- Flexible IT project roadmap
- Fast turn around time
- Quality support

eLearning

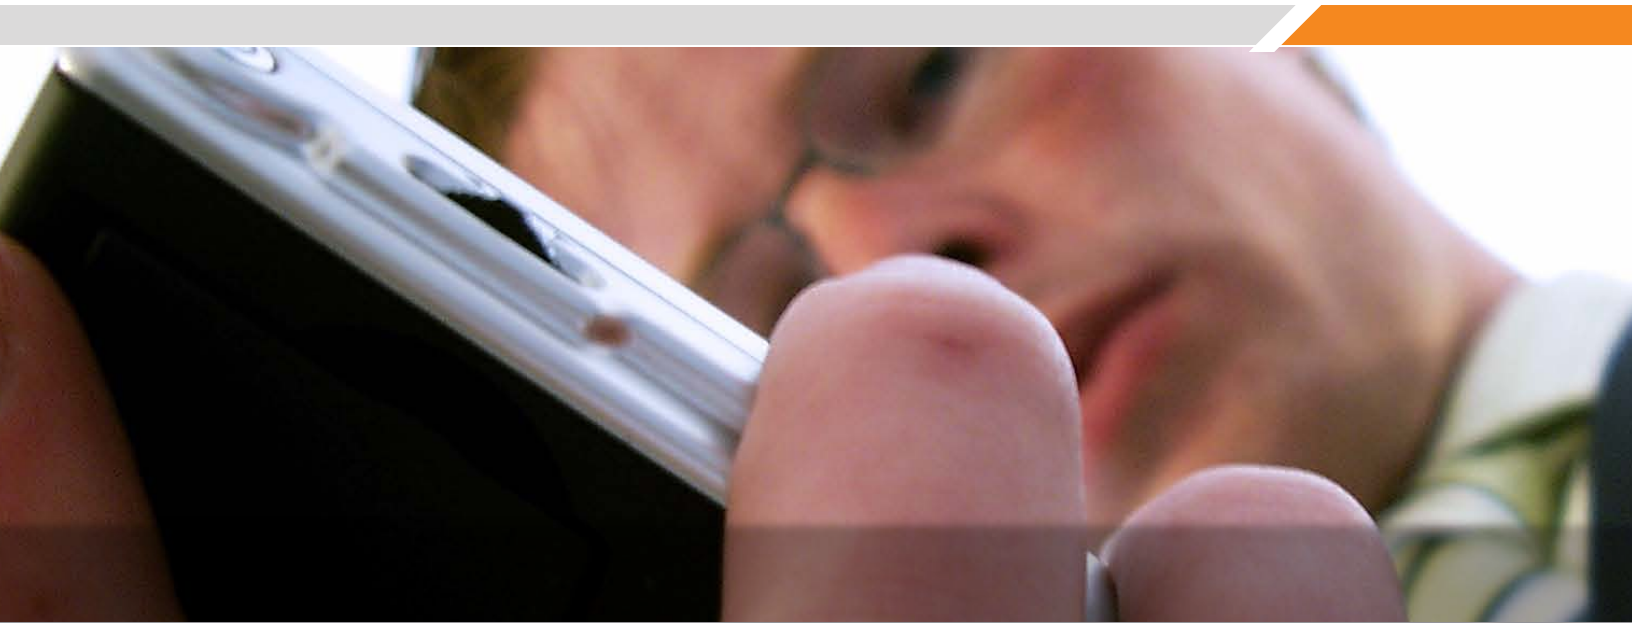

While training costs are racketeering in the global business space, eLearning solutions are becoming more complex.
